Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

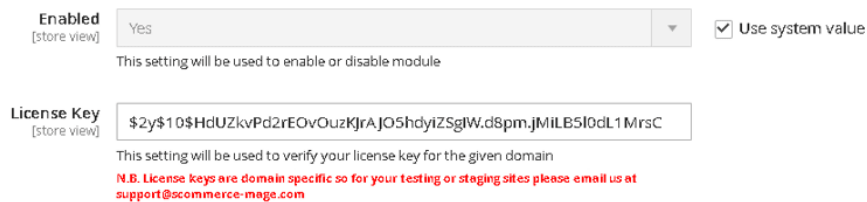

Configuration Settings for Admin Account Switcher

Go to **Admin > Stores > Configuration > Scommerce Configuration > Admin Account Switcher**

General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.
- **License Key** - Please add the license for the extension which is provided in the order confirmation email. Please note license keys are site URL specific. Please go to *Admin > Stores > Configuration > Scommerce Configuration > Core* and click on "Verify" to verify the license key.

General

Enabled [store view] Yes Use system value
This setting will be used to enable or disable module

License Key [store view] \$2y\$10\$HdUZkvPd2rEOvOuzKJrAJ05hdyiZSglW.d8pm.jMILB510dL1MrsC
This setting will be used to verify your license key for the given domain
N.B. License keys are domain specific so for your testing or staging sites please email us at support@sccommerce-mage.com

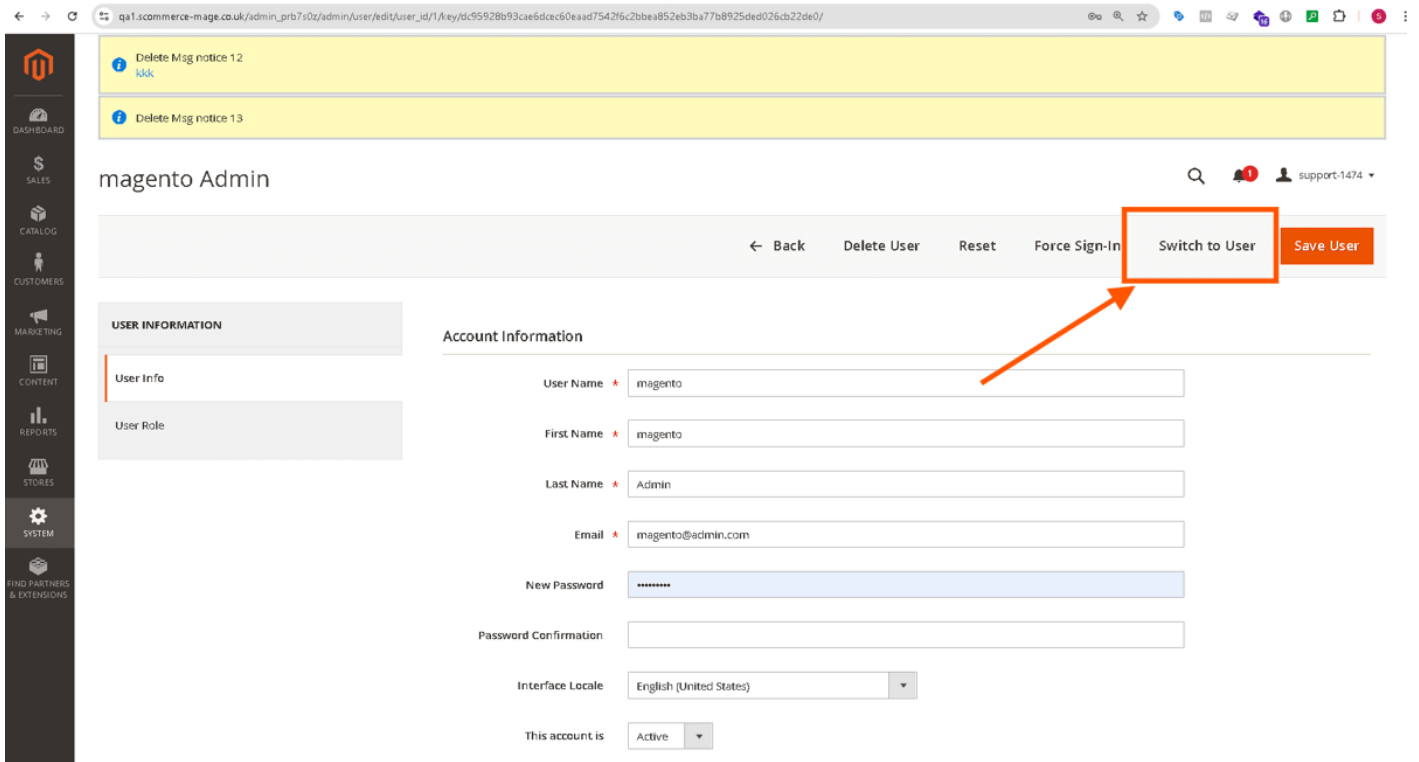

Admin Account Switcher Workflow

Using this extension an admin can login into another admin's account directly from admin edit form section without requiring a password which allows them to debug easily without having to reset the other admin's password.

The admin can only use this functionality if they have the "Scommerce Switch Admin Account" (**Admin>System>Permissions>User Roles>Select Role>Role Resources**) selected under role resources for their user role.

Go to Admin>System>Permissions>All Users, here select(click edit) the admins account in which you want to login.

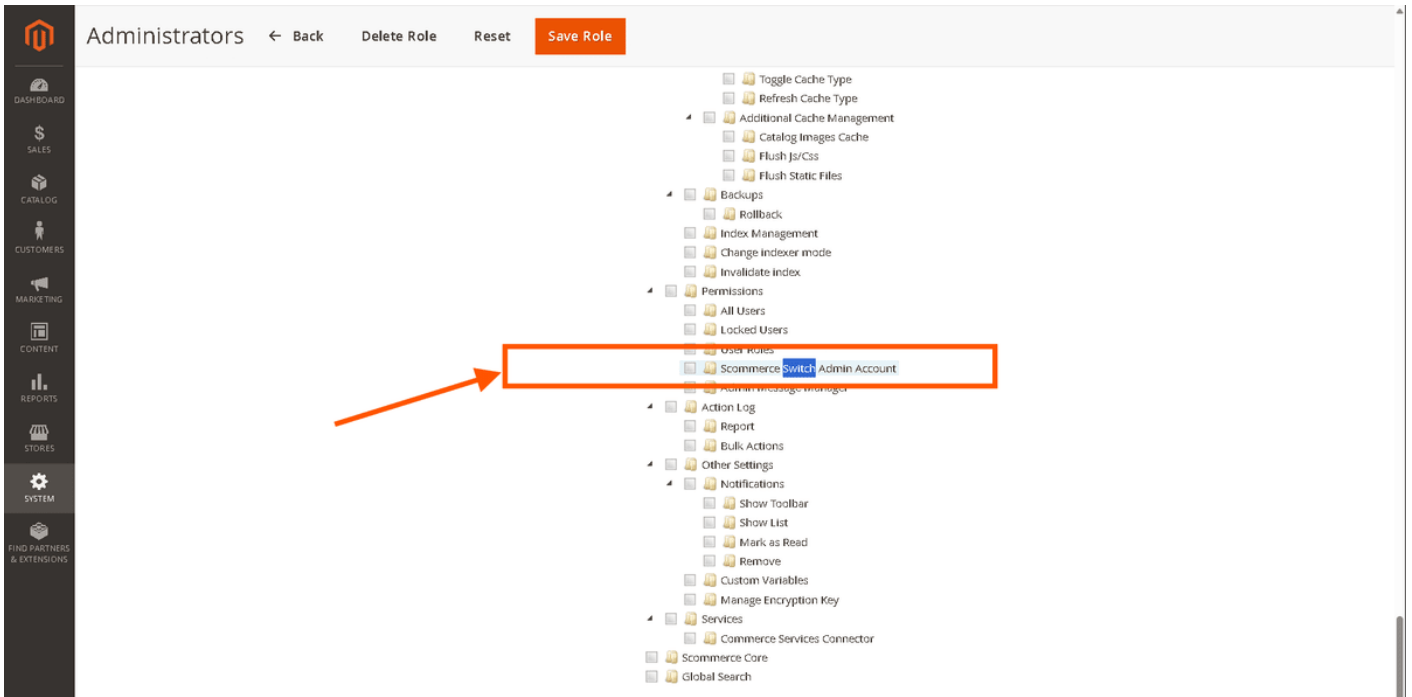

From the top menu click on "Switch User" and you will be logged into that admin's account without password authentication.

Admin Account Switcher Role

The "Switch to User" button is displayed **only if** the current admin user has the "**Scocommerce Switch Admin Account**" permissions in their user role.

To check this, you can go to *Admin>System>Permissions>User Roles>Role Resources* and check whether the user role has "Scocommerce Switch Admin Account Role" selected.

If you have a question related to this extension please check out our [FAQ Section](#) first. If you can't find the answer you are looking for then please contact support@scocommerce-mage.com.
