Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

Configuration Settings for Custom Currency Manager

Define list of custom currencies

Once you configure custom currencies by adding the currency code, symbol, plural name, and precision in the configuration, the newly added currency appears in the "Allowed Currencies" dropdown under Magento's default currency setup section.

To configure your store's currency settings, go to **Admin Panel > Stores > Configuration > General > Currency Setup**, where you can choose the base currency, default display currency, and allowed currencies. Please refer to the screenshots below for visual guidance on setting up custom currencies.

GENERAL General

The screenshot shows the Magento Configuration interface. A yellow notification bar at the top indicates a successful task completion. The main content area is titled 'Configuration' and shows the 'Scope' set to 'Default Config'. Below this, four red error messages are displayed, each with a red 'X' icon. The errors state that the 'Test' currency is currently selected in the system and is also found in the 'currency/options/allow' list for various scopes. A green bracket highlights these error messages. At the bottom, the 'GENERAL' tab is selected, and the 'General' section is visible.
