5. Email Received for a Sample Product

Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

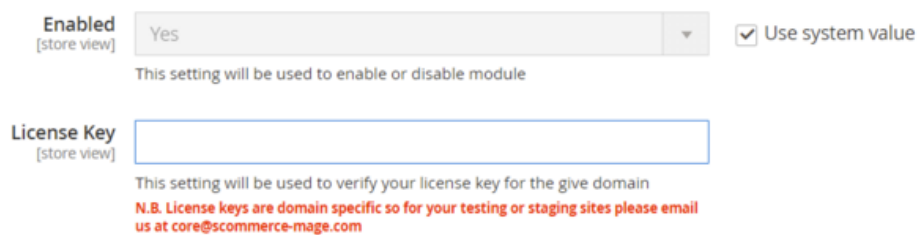

Configuration Settings for Sample Product

Go to **Admin > Stores > Configuration > Scommerce Configuration > Sample Product**

General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.
- **License Key** - Please add the license for the extension which is provided in the order confirmation email. Please note license keys are site URL specific. If you require license keys for dev/staging sites then please email us at support@sccommerce-mage.com.

Configure a Sample product

. Free Sample

Log in to the Admin Panel and navigate to **Catalog → Products**. Select the product you want to edit and click **Edit**. Scroll down to the **Sample Product** section and choose **Free Sample** from the **Sample Type** dropdown.

1. When the fields are empty

If all fields are left blank, the system will use the default configuration values.
On the frontend product page:

- The default quantity of **3** is applied, allowing the item to be added to the cart.
- The label **Free Sample** is displayed (e.g., for product *24-WB07*).

• Sample with Cost Associated

Log in to the Admin Panel and go to **Catalog** → **Products**. Open the product you want to update by clicking **Edit**. Scroll down to the **Sample Product** section.

From the **Sample Type** dropdown, select **Sample with Cost Associated**.

- If you leave all fields empty, the system will automatically use the default price, title, and quantity from the configuration settings.

The screenshot shows the Magento Admin Panel interface for editing a product. The breadcrumb trail is: demo3.scommerce-mage.co.uk/siteadmin/catalog/product/edit/id/13/set/15/type/simple/store/0/back/edit/. The product name is 'Overnight Duffle'. The left sidebar contains navigation icons for Dashboard, At a Glance, Sales, Catalog, Commerce AI Content Generator, Customers, Marketing, Content, Commerce, Reports, and Stores. The 'Sample Product' section is active, showing a dropdown menu for 'Sample Type' (store view) with 'Sample with cost associated' selected. Below this are input fields for 'Sample Price' (global) set to '£', 'Sample Product Max Qty' (store view), and 'Sample Product Text' (store view).

Sample Products are not Eligible for Coupon Discounts

• Coupon Code Validation for Free Sample Product

Log in to the Admin Panel and go to **Marketing** → **Cart Price Rules**. Create a new coupon code, for example **“testcode”**. When you apply this coupon on the frontend for the sample products, it should display a validation error, even if the code itself is valid, because coupon codes are **not meant to work for sample products**

More Choices:

• Coupon Code Validation for Sample with Cost Associated product

We've created a coupon code called **"testcode"** in the Admin Panel. This code works normally for regular products, but it **won't apply to the Sample product (e.g. 24-WB07)**. When a customer tries to use the coupon code for the sample products, the system will show a validation message saying the code isn't valid.
