## Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

<https://docs.scommerce-mage.com/magento-2-extensions/installation-via-composer/installation-via-composer>

## Front-end Screenshots

### Subcategories Grid View on the Front- end

After successfully enabling subcategories you can see them listed in a Grid view on the frontend. You can select the number of columns depending upon that the frontend will review the Grid view. To select the columns Navigate to **Catalog > Categories** and then select the category. Scroll down to **Sub-Categories Settings**. Here you will have the option to upload the thumbnail image, short description and number of columns. Each of the subcategories will be listed with a description, background and image as defined by you.
