 - *Rate Limiter*

Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

Configuration Settings for Antispam

Go to **Admin > Stores > Configuration > Scommerce Configuration > Antispam Catalog Search**

General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.
- **License Key** - Please add the license for the extension which is provided in the order confirmation email. Please note license keys are site URL specific. If you require license keys for dev/staging sites then please email us at support@sccommerce-mage.com.
- **Black List** - You can blacklist certain keywords from the search of your website. Enter comma separated blacklist words which you don't want customers or crawlers to search on your website. For example "casino", "gambling" etc.
- **Disallow URLs**- Select "no" to enter URL's in your website's search and "yes" to allow.
- **Disallow Foreign Words**- Use this setting to define whether users can enter Foreign words in the search or not.

General

The screenshot shows the configuration page for the Antispam Catalog Search module. It includes the following settings:

- Enabled** (store view): A dropdown menu set to "Yes". Below it, a note states: "This setting will be used to enable or disable module".
- License Key** (store view): A text input field containing the license key: "\$2y\$10\$1WGUFUluIFfOfZfkP4wQeco8GwSql5nyuvhA/J7gTAv6pU5LPnf". Below it, a note states: "This setting will be used to verify your license key for the give domain". A red note below that reads: "N.B. License keys are domain specific so for your testing or staging sites please email us at core@sccommerce-mage.com".
- Black List** (store view): A text input field containing the words: "casino,free,gambling,joust,test,injection". Below it, a note states: "This setting allows you to enter list of comma separated blacklist words which you don't want customers or crawlers to search on your website. For example "casino", "gambling" etc."
- Disallow URLs** (store view): A dropdown menu set to "Yes". To its right is a checkbox labeled "Use system value" which is unchecked. Below it, a note states: "This setting controls whether customers can search for URLs or not".
- Disallow Foreign Words** (store view): A dropdown menu set to "Yes". To its right is a checkbox labeled "Use system value" which is unchecked. Below it, a note states: "This setting controls whether customers can search with foreign words or not".

- **Disallow Numbers**- Select "no" to allow customers to search with numbers and "yes" to disallow.
- **Disallow Special Characters**- Select "no" to allow customers to search with special characters and "yes" to disallow.

- **Disallow repeated character-** Select "no" to allow customers to search with repeated characters and "yes" to disallow. It prevents repeated letters in the search query.
- **Number of repeated characters** - Enter the maximum allowed number of repeated characters
- **Message for invalid searches-** Enter the message to be displayed when an invalid search is made by the customer.

<p>Disallow Numbers <small>[store view]</small></p>	<p>Yes</p>	<p><input type="checkbox"/> Use system value</p>
<small>This setting controls whether customers can search with numbers or not</small>		
<p>Disallow Special Characters <small>[store view]</small></p>	<p>Yes</p>	<p><input type="checkbox"/> Use system value</p>
<small>This setting controls whether customers can search with special characters or not</small>		
<p>Disallow repeated character <small>[store view]</small></p>	<p>Yes</p>	<p><input type="checkbox"/> Use system value</p>
<small>This setting allow you to prevent repeated letters in search query (for example 11111111111111111111)</small>		
<p>Number of repeated characters <small>[store view]</small></p>	<p>3</p>	<p><input type="checkbox"/> Use system value</p>
<small>This setting allow you to add allowed number of repeated character</small>		
<p>Message for invalid searches <small>[store view]</small></p>	<p>Unfortunately you are searching for restricted word which is not allowed on our website</p>	
<small>This message will be shown to customers when they are trying to search restricted text</small>		

Rate Limiter

- **Enabled-** Select "yes" to block Ip address of the customers based on the number of searches performed in a specific time.
- **Number of seconds-** Enter the time limit under which a user can make specific searches. If the number of searches exceeds this time limit then their IP will be temporarily blocked.
- **Number of searches-** Enter the number of searches allowed for a user under the time restraint entered in the above setting.
- **Minutes to block IP-** Define the Ip block time for users.
- **Log Enabled-** Select "yes" to create logs under /var/log/antispamcatalogsearch.log
- **Message-** Enter the message to be displayed when the IP of an user is blocked.

Enabled <small>[store view]</small>	<input type="text" value="Yes"/>	<input type="checkbox"/> Use system value
<small>This setting is to block IP addresses based on number of searches getting performed within given time period</small>		
Number of seconds <small>[store view]</small>	<input type="text" value="30"/>	<input type="checkbox"/> Use system value
<small>This setting controls how many searches can be performed within the time period. This setting is related to "number of searches" settings. For example 10 searches can be done within 30 seconds.</small>		
Number of searches <small>[store view]</small>	<input type="text" value="10"/>	<input type="checkbox"/> Use system value
<small>This setting controls how many searches a particular IP address can perform</small>		
Minutes to block IP <small>[store view]</small>	<input type="text" value="1"/>	<input type="checkbox"/> Use system value
<small>This setting controls how long you want to block a certain IP address.</small>		
Log Enabled <small>[store view]</small>	<input type="text" value="Yes"/>	
<small>This setting will enable logging and file will be created under /var/log/antispamcatalogsearch.log</small>		
Message <small>[store view]</small>	<input type="text" value="Unfortunately your IP address has been blocked as you extended number of searches within the given time period. Please try again in {{time}} minutes time."/>	<input type="checkbox"/> Use system value
<small>This message will be shown to customer when they reach maximum limit</small>		

Frontend

Invalid Search

When an user searches with diallowed character then the warning message appears on the frontend as shown below:-

The screenshot shows the LUMA website header with the logo and navigation menu. Below the navigation menu, a search warning message is displayed in a yellow box with a red border: "Unfortunately you are searching for restricted word which is not allowed on our website". Below this message, there are sections for "Compare Products" (with a warning "Your search returned no results.") and "My Wish List" (with the text "You have no items in your wish list.").

Rate Limiter

When an user exceeds the search limit then the IP block message appears as shown below:-

Home >

 Unfortunately you are searching for restricted word which is not allowed on our website

 Unfortunately your IP address has been blocked as you extended number of searches within the given time period. Please try again in 1 minutes time.

Compare Products

 Minimum Search query length is 3

You have no items to compare.

My Wish List

You have no items in your wish list.

If you have a question related to this extension please check out our **FAQ Section** first. If you can't find the answer you are looking for then please contact **support@scommerce-mage.com**.

Magento 2 Not On The High Street Integration

Installation and User Guide for Magento 2 Noths Integration Extension

Table of Contents

1. Installation
 - *Installation via app/code*
 - *Installation via Composer*
2. Configuration Settings for Noths Integration
 - *General Settings*
 - *Integration Settings*
3. Noths Order(s) View from Back-end
 - *Noths Order Import*
 - *Noths Order Details on Order View Page*
 - *Noths Order Logs*

Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

Configuration Settings for Noths Integration

Go to **Admin > Stores > Configuration > Scommerce Configuration > Noths**

General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.
- **License Key** - Please add the license for the extension which is provided in the order confirmation email. Please note license keys are site URL specific. If you require license keys for dev/staging sites then please email us at support@sccommerce-mage.com.

General Settings

The screenshot shows the 'General Settings' section for the Noths module. It features two main settings:

- Enabled [store view]:** A dropdown menu currently set to 'Yes'. Below it, a note states: 'This setting will be used to enable or disable module'. A callout box points to this dropdown with the text: 'Select "Yes" to enable the module'.
- License Key [store view]:** A text input field containing the license key: '\$2y\$10\$kw8Nr72W.RXLb5JgstqN8uEhu8iVbr4185RveZ'. Below it, a note states: 'This setting will be used to verify your license key for the give domain'. A callout box points to this field with the text: 'Enter the license key for the module'.

At the bottom of the license key section, there is a red note: 'N.B. License keys are domain specific so for your testing or staging sites please email us at core@sccommerce-mage.com'.

Integration Settings

- **API Uri** - NOTHS API URI should be mentioned here.
- **API Key** - Please enter API Key
- **API Log** - Select "Yes" to enable the API Log. If set to "Yes" then it will log communication with Noths API.
- **Select the allowed order statuses** - Please select order status which will be imported from Noths
- **Cron for Order Import** - Please add define schedule how often you want to update transactions
- **Select the store for NOTHS Orders** - Please select the store for Noths orders.

Api Uri [store view] Use

NOTHS API URI should be mentioned here.

Api Key [website]

Api Log [store view] Yes Use

Yes/No". If this is set to yes then it will log communication with NOTHS API

Select the allowed Order Statuses [website]

This setting controls the visibility of the cookie consent banner on your website. When enabled, the banner will persistently display until the user actively consents or declines the use of cookies even when all cookies are granted by default. If disabled, the banner will be hidden when all cookies are granted by default.

Popup Styling

- **Modal Border** - Select "Yes", if you want to set modal border. If "Yes" then you can set border color for the settings Modal box.
- **Popup Border Color** - Enter popup border color. We've set the popup border color white, which you can see in the screenshot.
- **Toggle Color** - Enter Toggle color. We've set the toggle color. which you can see in the screenshot.
- **Header Background Color** - Enter header background color. Background color of the Modal box title.
- **Header Font Color** - Enter header font color.
- **Header Bottom Border** - Select "Yes", if you want to set the bottom border. If "Yes" then bottom border of the Modal box header will be shown.
- **Header Bottom Border Color** - Enter header bottom color. We've set the red header bottom border.
- **Footer Background Color** - Enter footer background color.
- **Footer Font Color** - Enter footer font color.
- **Footer Top Border** - Select "Yes", if you want to set footer top border. If "Yes" then top border of the footer of the Modal Box will be shown.

Popup Styling

	<small>If "Yes" then top border of the footer of the Modal box will be shown</small>	

- **Footer Top Border Color** - Enter footer top border color.
- **Header Logo** - Choose logo for the modal header. It will be shown in the left top corner in header.
- **Close Image** - Upload close image.
- **Active Tab Background Color** - It will highlight the selected choice text.
- **Number Tabs** - Select "Yes", if you want number tabs on cookie modal.
- **Tab Header Color** - Enter tab header color.
- **Tab Active Color** - Enter active tab color.
- **Custom Button Style** - Select "Yes", if you want to style button.
- **Custom Checkbox** - Select "Yes", if you want to show cookie choice button.
- **Font Family** - Enter base font family for the Modal Box. Should be string e.g. Arial. Font should be available on the site.
- **Accept Button Text Color** - Enter text color of the "Accept" button on the Cookie Message

Footer Top Border Color [store view] Use system value
Color of the top border for the footer

Header Logo [store view]  No file chosen Use system value
 Delete Image
Choose here logo for them modal header. It will be shown in the left top corner in header

Close image [store view] No file chosen Use system value
Choose here custom close image. If it's set then it will replace standard cross image

Active Tab Background Color [store view] Use system value
Background color for the active tab in the left sidebar of the Modal box

Number tabs [store view] Use system value
If "Yes" then top border of the footer of the Modal box will be shown

Tab Header Color [store view] Use system value
Header text color of the tab content

Tab Active Color [store view] Use system value
Text color of the active tab

Custom Button Style [store view] Use system value
If "Yes" then custom styles for the buttons will be used instead of defaults

Custom Checkbox [store view] Use system value
If "Yes" then you can choose images for "On" an "Off" state of the checkbox. Images will be used instead of the standard checkboxes. Both images should be set

Font Family [store view] Use system value
Base font family for the Modal box. Should be string e.g. Arial. Font should be available on the site

Accept Button Text Color [store view] Use system value
Text color of the "Accept" button on the Cookie Message

- **Accept Button Background Color** - Enter Background color of the "Accept" button on the Cookie Message.
- **Decline Button Text Color** - Enter text color of the "Decline" button on the Cookie Message.
- **Decline Button Background Color** - Enter Background color of the "Decline" button on the Cookie Message.
- **Notice Height** - Set min height of the Cookie Message. E.g. 80
- **Required cookie option text** - Set to "Always Active", this text will replace checkbox for mandatory cookies
- **Custom CSS** - Provide CSS code for custom style.

Accept Button Background Color <small>[store view]</small>	<div style="background-color: #32d248; height: 20px; width: 100%;"></div> 32d248	<input type="checkbox"/> Use system value

Background color of the "Decline" button on the Cookie Banner		
Notice Height <small>[store view]</small>	<input style="width: 100%; height: 20px;" type="text"/>	<input type="checkbox"/> Use system value
Set min height of the Cookie Message. E.g. 80		
Required cookie option text <small>[store view]</small>	<input style="width: 100%; height: 20px;" type="text"/>	<input checked="" type="checkbox"/> Use system value
This text will replace checkbox for mandatory cookies		
Custom CSS <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 5px; min-height: 40px;"> <pre>.modal-popup.confirm .modal-inner-wrap .modal-content {padding-right:0; padding-left:0}</pre> </div>	<input type="checkbox"/> Use system value
For advanced users. Place here CSS styles		

Additional Tabs

- **First Tab Title** - Provide title of the first tab you want to display on the frontend cookie pop up. This tab will be shown first before cookie choices. Both Title and Text should be set to appears on the Modal box
- **First Tab Text** - Enter first tab text. The text will be shown on the Modal box on click of first tab. We've set first tab as "Your Privacy ".
- **More Information Title** - Provide more information title. This will be shown after all cookie choices as a last tab. Both title and link should be set to appears on the Modal box
- **More Information Link** - Provide link where you want to redirect it. Click on this link will redirect you to Information page.

First Tab Title <small>[store view]</small>	<input type="text"/>	<input checked="" type="checkbox"/> Use system value
	Title of the additional tab. This tab will be shown first before cookie choices. Both Title and Text should be set to appears on the Modal box	
First Tab Text <small>[store view]</small>	<input type="text"/>	<input checked="" type="checkbox"/> Use system value
	Text for the additional information tab	
More information Title <small>[store view]</small>	<input type="text"/>	<input checked="" type="checkbox"/> Use system value
	More information link text. This will be shown after all cookie choices as a last tab. Both title and link should be set to appears on the Modal box	
More information link <small>[store view]</small>	<input type="text"/>	<input checked="" type="checkbox"/> Use system value
	More information link. E.g. http://test.com/moreinfo	

Admin Configuration for Manage Cookie Choices

- **Manage Choice List** - To create and manage cookie choices, go to **Admin**
- **Customers > Manage Cookie Choices > Manage Choice List**. If you need to make some modifications in the cookie choices information, you should click "Edit" in the Action column. The grid includes the following columns: -
- Cookies can be created for specific store views and these cookies are only available in that particular store view.

The screenshot shows the Magento 2 Admin interface for managing cookie choices. The page title is "Manage Choice List". A sidebar on the left contains navigation menus for SALES, CATALOG, CUSTOMERS (highlighted), MARKETING, CONTENT, and STORES. An orange button "Add New Cookie Choice" is located in the top right. The main table lists cookie choices with the following data:

ID	Choice Name	Cookie Name	Store View	Required	Action
1	Strictly Necessary Cookies	required_cookies	All Store Views	Yes	Select
2	Performance Cookies	performance_cookies	Main Website Main Website Store German View	No	Select
3	User Data Cookie	userdata_cookie	Main Website Main Website Store German View	No	Select
4	Marketing Cookies	marketing_cookie	All Store Views	No	Select
8	Analytics Cookies	analytics_cookie	All Store Views	No	Select
10	Strictly Necessary Cookies	required_cookies	All Store Views	Yes	Select

- **Add New Cookie Choice** - To create a new cookie choice, click on the "Add New Cookie Choice" button from **Admin > Customers > Manage Cookie Choices > Manage Choice List > Add New Cookie Choice**, it redirects on "New Choice" page, by providing all the below configuration details you can create the cookie choice.
 - **Choice Name** - Enter the choice name. This is the text which represents the type of the cookie you are using under it.
 - **Cookie Name** - Define the cookie name. Cookie name will be used to enable/disable your relevant trackings. To explore more about Cookies, please check the [Privacy and Cookie Policy](#) section.
 - **Store View** - Select store view.
 - **Choice Description** - Add the choice description. This description will appear on the cookie pop up when user clicks on the cookie choice name.
 - **Cookies Created By** - Add the created by details. This is just an information which will appear on the cookie pop up under "Cookies are user by" section.
 - **Required** - Select "Yes" to make cookie essential, else select "No". If set to "Yes" then the cookie choice will always be selected and you can't turn "Off" it.
 - **GTM**- Set this to "Yes" if you want to control GTM using this cookie. GTM will only be enabled when this cookie is accepted.
 - **Set by Default** - Select default status "Yes" or "No". If set to "Yes" then by default the cookie choice will be selected.

Anonymize Orders from Admin Section

When you select action "Anonymise order" from **Admin > Sales > Orders > Actions > Anonymise Order > Click on Submit button**, then it anonymise customers data, which can't be reversed. Before "Submit" it asks for confirmation and displays a message popup says "Are you sure you want to anonymise selected transaction data because of this action can't be reversed?".

Enable / Disable Tracking Without GTM

Note:- Only implement this step if you are not using both our GTM and GDPR

modules. If you are using both modules then you can set up consent mode v2 using the following guide:-

{% content-ref url="../../../analytics-and-tracking-extensions/magento-2-consent-modes-setup-guide.md" %} [magento-2-consent-modes-setup-guide.md](#) {% endcontent-ref %}

Using Module

You can enable or disable GTM tracking using cookies. We have provided an additional check in cookie setup which confirms whether GTM should be checked alongwith the cookie or not. when this check is enabled if the customer doesnt accept the cookie then this tracking won't fire. If multiple cookies have the same option enabled then if any one of the cookie is accepted GTM will fire on the store.

Go to Customers>Manage Cookie Choices then create a new cookie or edit the existing one and set GTM to 'Yes'.

General Information

Choice Name *	<input type="text" value="Marketing Cookies"/>
Cookie Name *	<input type="text" value="marketing_cookie"/>
Store View *	<div><p>All Store Views ?</p><p>Main Website</p><p>Main Website Store Default Store View</p></div>
Choice Description *	<input type="text" value="Marketing cookies are used to track visitors across websites. The intention is to display ads that are relevant and engaging for the individual customers and thereby more valuable for publishers and third party advertisers."/>
Cookies Created By	<div><p>Facebook Remarketing</p><p>Google Remarketing</p></div>
Required *	<input type="text" value="No"/>
GTM *	<input type="text" value="No"/>
Set By Default *	<input type="text" value="No"/>

Manually Adding Code

This section will cover Enabling or Disabling tracking without using Google Tag Manager. You can do that by including tracking function in your code, let us learn how. If you are using any of our tracking extensions or any other third party extension and you don't want to send information to Google then you need to check for the cookie name e.g. "statistics_cookie" and this will be set to 1 for "accept" and 0 for "decline", based on cookie value it will enable or disable the tracking.

In case you are using a third party extension then you need to add the code given below. This code needs to be added where your tracking has been implemented.

Here is the function which will force your tracking not to run unless the cookie has been accepted by the customer from cookie notification message.

e.g. You can add name of your GDPR cookie, here for our GDPR extension the name of cookie key is "statistics_cookie", which we have been using in below code.

```
/**
Check if has cookie with accepted cookie policy
*
@return bool
*/
protected function hasCookie()
{
/**
* @var \Magento\Framework\Stdlib\CookieManagerInterface
*/
$cookie = (string)$this->_cookieManager->getCookie('statistics_cookie'); if ($cookie=="0"
{ return false;
}
else{
return true;
}
}
```

Integrate Cookies with GTM Pro Tracking

Note:- Only implement this step if you are not using both our GTM and GDPR modules. If you are using both modules then you can set up consent mode v2 using the following guide:-

{% content-ref url="../../../analytics-and-tracking-extensions/magento-2-consent-modes-setup-guide.md" %} [magento-2-consent-modes-setup-guide.md](#) {% endcontent-ref %}

You can integrate cookies with GTM Pro by following the below steps in GTM:-

Step 1 - The very first step is to create your cookie from the admin panel. To do that please refer to the 4th Part in this guide. The key thing to remember is the name of the cookie that you create in this step.

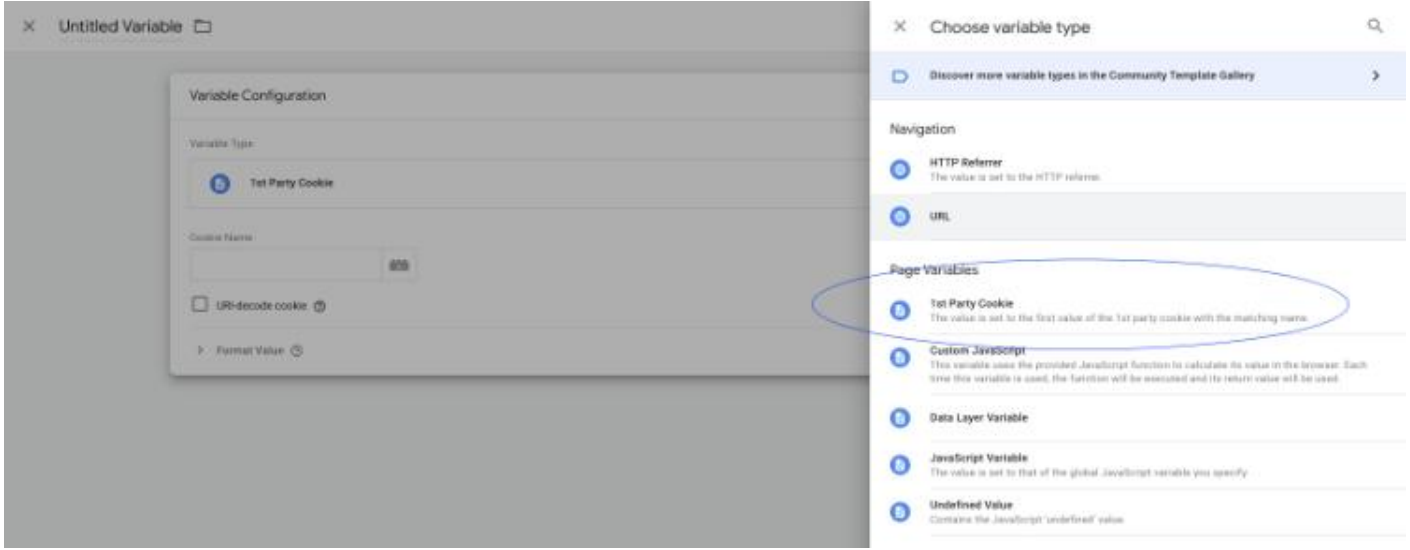

ID	Choice Name	Cookie Name	Store View	Required	Action
<input type="checkbox"/>	Strictly Necessary Cookies	required_cookies	All Store Views	Yes	Select
<input type="checkbox"/>	Performance Cookies	performance_cookies	All Store Views	No	Select
<input type="checkbox"/>	Statistics Cookies	statistics_cookie	All Store Views	No	Select
<input type="checkbox"/>	Marketing Cookies	marketing_cookie	All Store Views	No	Select

Step 2 - The next step is to verify whether your cookie is working properly. Go on your website and accept or decline the cookie you have created in the beginning. Now navigate to the Page inspector of your browser. Next go into application and then on the left navigation go to storage>cookies and then click on your website. A list of cookies will appear before you as you can see in the image. Now suppose you created a cookie named "Statistics_cookie" in the first step and have accepted it on the website then the value of this cookie will appear as 1. Vice versa if you have declined this cookie then the value will be 0.

Step 3 - Open google tag manager, go into variables section and Create a new variable named " **statistics_cookie**", variable type should be **1st-Party cookie** and give the name of the cookie as "**statistics_cookie**". Keep in mind the name of the cookie should be exactly same as you have created in the admin panel. For instance, we created a cookie named "Statistics_cookie" so we have a variable named exactly same.

Step 4 - Now navigate to triggers in GTM and select a trigger and add a custom event as follows: -

- From first drop-down- select variable name created in Step 1 i.e. "**statistics_cookie**"
- From second drop-down- select equals
- Third Input box- put value 1

Trigger Configuration

Trigger Type

<> Custom Event

Event name

fireRemarketingTag_cart

This trigger fires on

Event equals fireRemarketingTag_cart

marketing_cookie equals 1

References to this Trigger

⊙ AdWords Dynamic Remarketing Cart Tag

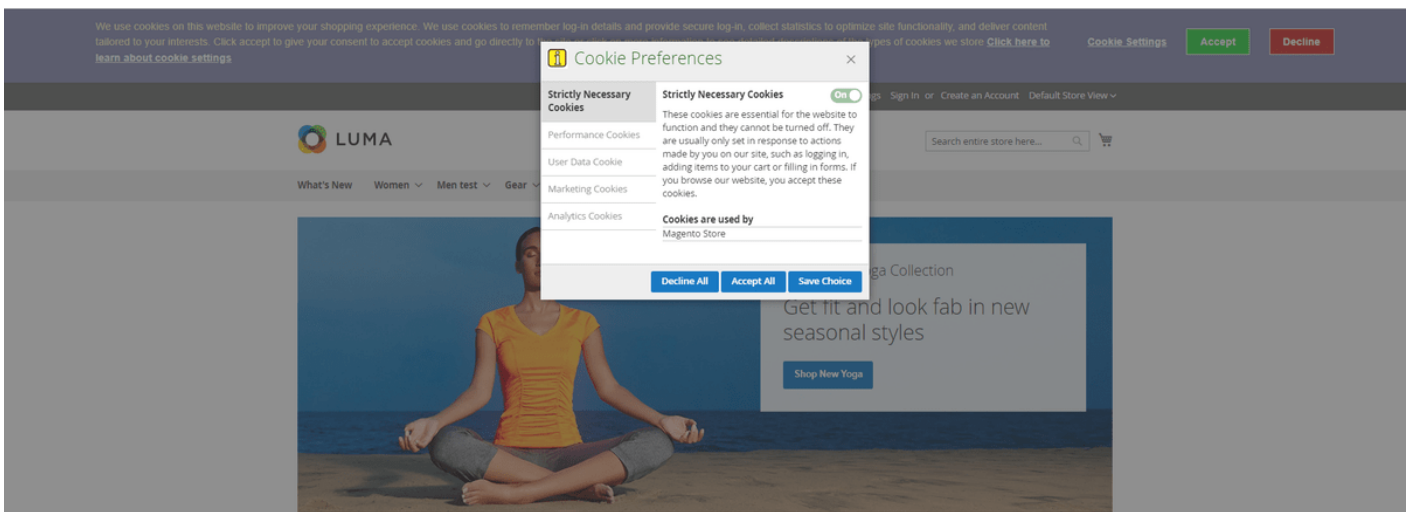

Step 5- Associate the trigger created in Step 4 with any of the existing tags and that tag will only fire when customer accepts the cookie on your website.

Front-end Site View

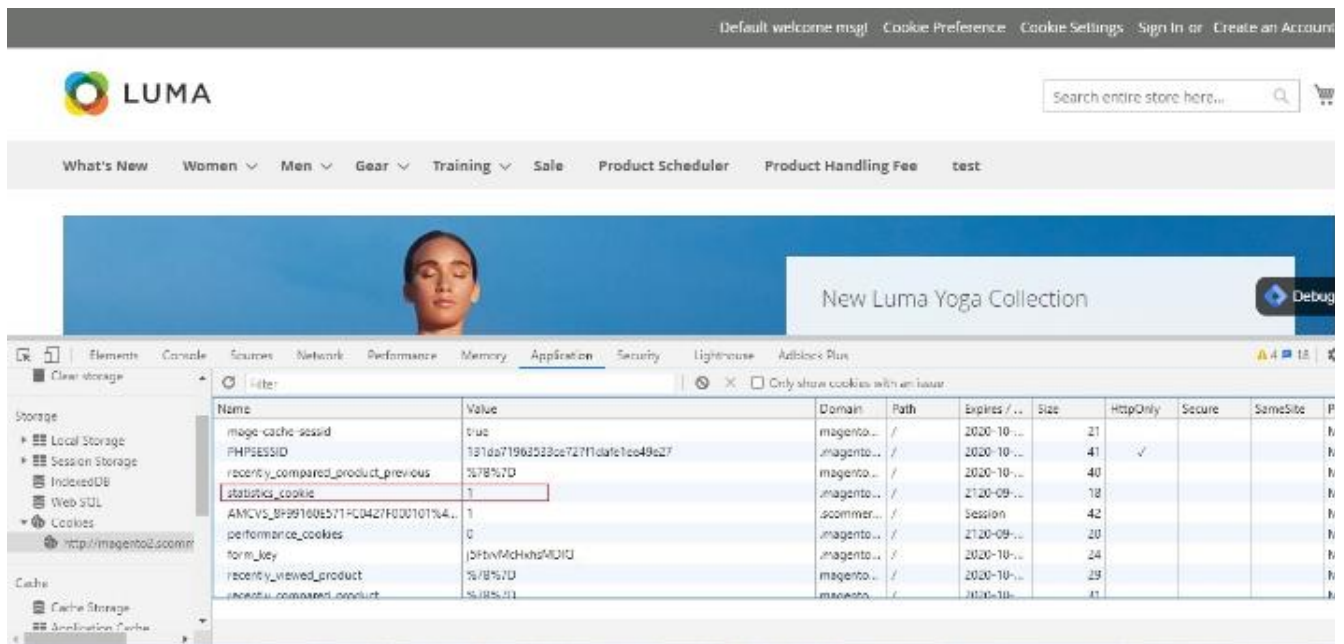

Front-end Site View - Integrate Cookies with GTM Pro Tracking

Let us see how it works on the front-end.

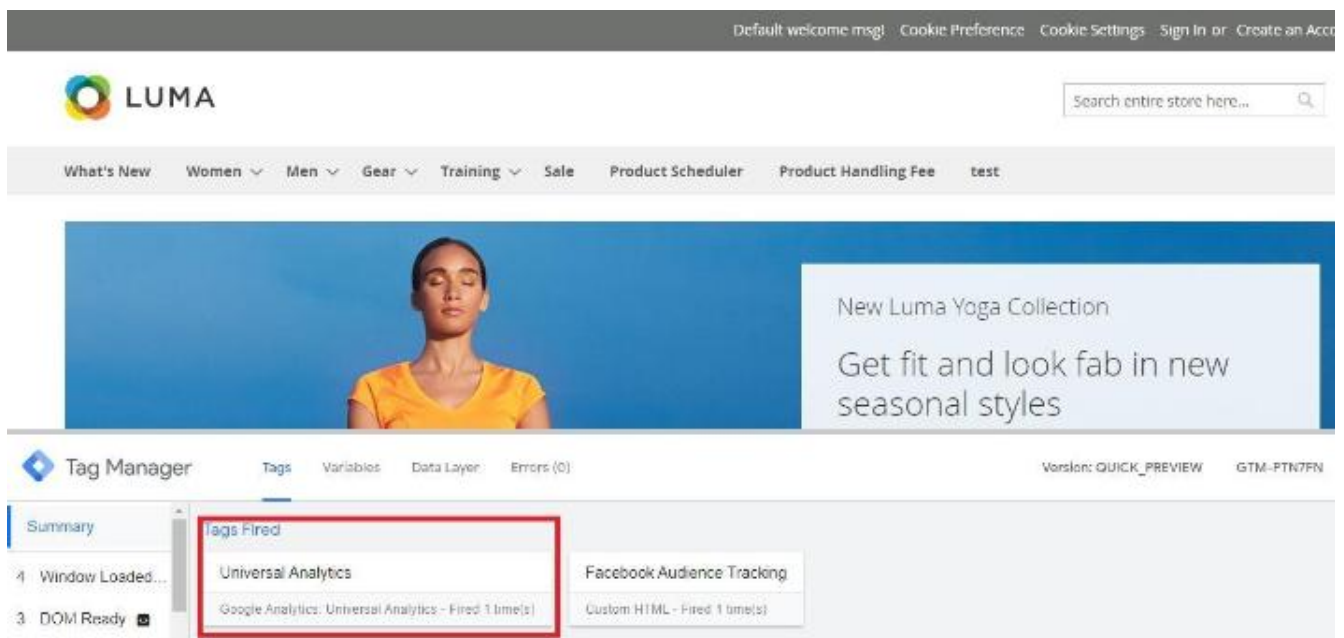

- Visit the store and go to cookie settings on the pop-up. In the cookie preferences:- -- select your cookie. In this case we have created statistics cookie. -- Next from the top right corner select the checkbox to enable the cookie and save your choice.

- Next check the inspector of your browser to verify whether your cookie is enabled/disabled. If you have enabled the cookie then the value will be 1 and if it is disabled then the value will be 0. Refer to the image below.

- Finally check the GTM pro to see whether the tags that we associated with your cookie have fired or not. In our case universal analytics is fired since we added the cookie settings for google analytics. Similarly if the cookie is disabled I.e value is 0 then this tag won't be fired.

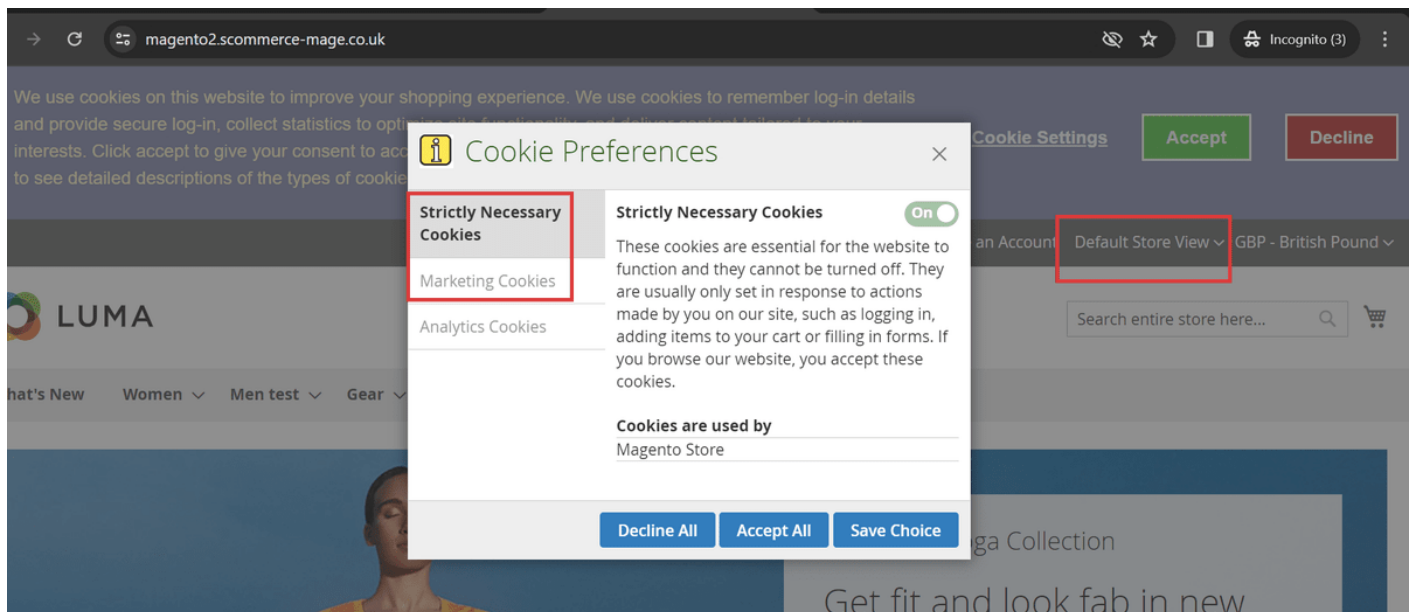

Cookie Pop-up- Cookie Accept

Cookies are used to improve the experience for user. Once you accept, the file is added and the cookie helps analyse web traffic or lets you know when you visit a particular site. Cookies allow web applications to respond to you as an individual.

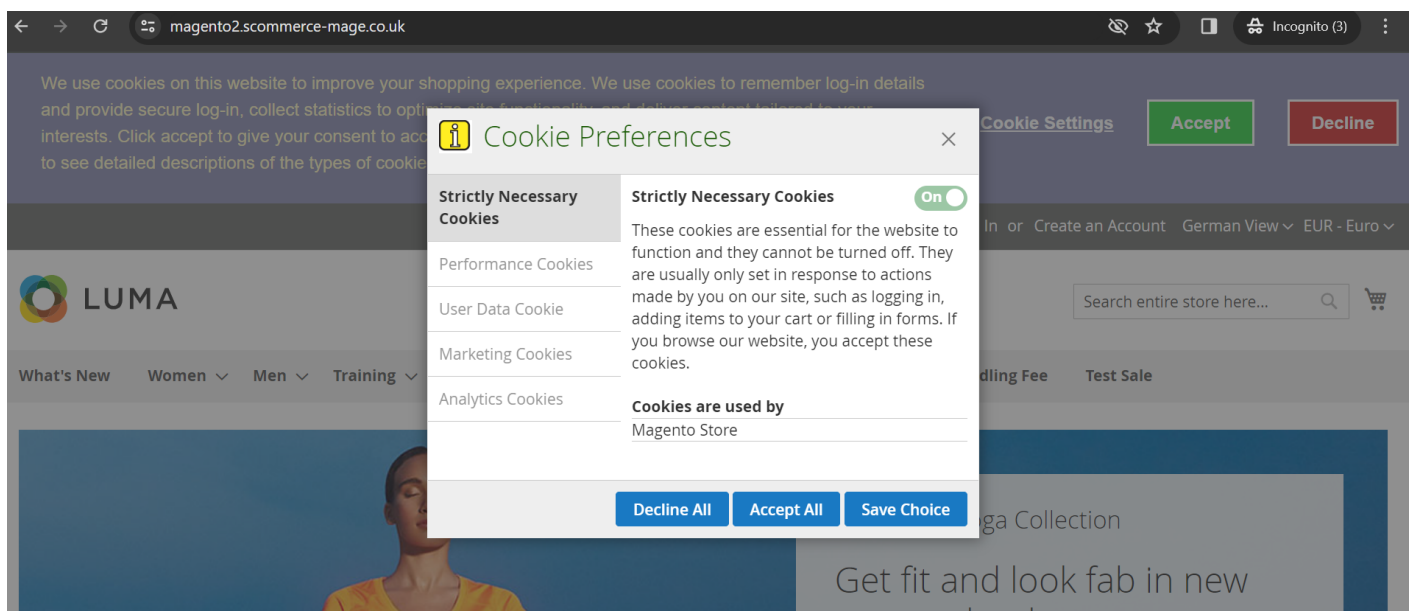

Cookie Pop-up- Cookie Accept for different store views

Cookies are used to improve the experience for user. As we created different cookies for different store views we will see their behaviour on the frontend.

- Accept cookie for default store view:-

- Accept cookie for German Store view

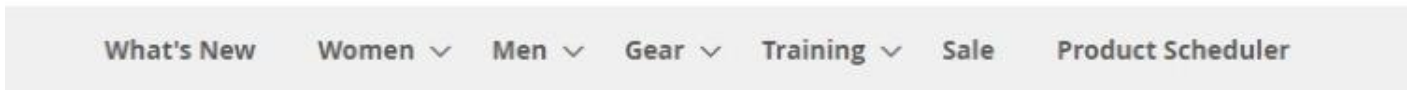

Check the Value of the Accepted Cookies on the Front-end

You can check the value of the accepted cookies by using developer tool (F12). Here is the path to check, **Press F12 > Network > Storage > Cookies > Click on site URL > Check the cookies**

status/value under "Value" column.

When you "accept" cookies, the value will be set to "1".

Visibility of "Accept All" Button on the Cookie Popup

The "Accept All" button will be shown on the cookie popup, if all cookie choices are not required and "Set by Default" for cookie choices set to "No" from **Admin > Customers > Manage Cookie Choices > Manage Choice List > Select Cookie Choice > Edit > Set by Default - "Yes/No"**. If set to "Yes" then "Accept All" won't appear.

Newsletter Subscription

Once Enable Newsletter is configured from **Admin > Stores > Configuration > Scommerce Configuration > GDPR > Privacy Settings > Enable Newsletter - "Yes"** , then you can see the privacy agreement checkbox on the newsletter subscription. This is a mandatory option. Click on "Privacy Policy" link redirects to privacy policy page.
