# Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

<https://docs.scommerce-mage.com/magento-2-extensions/installation-via-composer/installation-via-composer>

# Configuration Settings for Competition

Go to **Admin > Stores > Configuration > Scommerce Configuration > Competition**

### Social Booster-Facebook Settings

<b>Enable</b> [global]	<input type="text" value="Yes"/>	Select "Yes" to enable the Facebook settings
	<small>This setting will enable or disable Facebook sharing for competitions on global level.</small>	
<b>Facebook Fan page</b> [global]	<input type="text" value="https://www.facebook.com/scommerce-mage"/>	Please add the URL of Facebook fan page
	<small>Please add full URL of your Facebook page for example <a href="http://www.facebook.com/scommerce-mage">www.facebook.com/scommerce-mage</a>.</small>	
<b>Facebook App Id</b> [global]	<input type="text" value="1407981859468875"/>	Please add the Facebook App Id
	<small>Please add your Facebook application Id this can be obtained by creating app by clicking on the following URL (<a href="https://developers.facebook.com/apps">https://developers.facebook.com/apps</a>) after login to your Facebook account</small>	

## Social Booster - Twitter Settings

- **Enable (Yes/No)** - Please select "Yes" or "No" to Twitter for competitions on global level.
- **Twitter Account** - Please add unique id of your twitter account. For example our twitter account is <http://www.twitter.com/scommerce/mage> so you just need to put Scommerce Mage.

## Social Booster-Twitter Settings

The screenshot shows two settings for 'Social Booster-Twitter Settings'. The first is 'Enable [global]' with a dropdown menu set to 'Yes'. Below it is the text: 'This setting will enable or disable twitter for competitions on global level.' The second is 'Twitter Account [global]' with a text input field containing 'scommercemage'. Below it is the text: 'Please add unique id of your twitter account. For example our twitter account is http://www.twitter.com/scommercemage so you just need to put scommercemage'. Two callout boxes with orange arrows point to the 'Enable' dropdown and the 'Twitter Account' input field, both containing the text: 'Select "Yes" to enable the Facebook settings'.

## Email

- **Enable (Yes/No)** - Please select "Yes" or "No" for competition email.
- **Email Sender (Textbox)** - Please add email sender for competition email.
- **Email Template for competition entry email** - Please select dropdown to select default global level competition entry email template from the available list of templates. A default template will be added with the extension install.

The screenshot shows three settings for 'Email'. The first is 'Enable [global]' with a dropdown menu set to 'Yes'. Below it is the text: 'This setting will enable or disable email.' The second is 'Email Sender [global]' with a text input field containing 'test@gmail.com'. Below it is the text: 'Please add email sender for competition email.' The third is 'Email Template for competition entry email [global]' with a dropdown menu set to 'Competition entry email template (Default)'. Below it is the text: 'Please select email template for competition entry email'. Three callout boxes with orange arrows point to the 'Enable' dropdown, the 'Email Sender' input field, and the 'Email Template' dropdown, all containing the text: 'Select "Yes" to enable the Facebook settings'.

## Create/Edit/Delete Custom form fields
