

# Jquery Asynchronous Image Loader (JAIL)

## Magento Jquery Asynchronous Image Loader Extension Installation/Set-up Guide

- **Disable Compilation Mode:** To check that this is disabled, go to System->Tools->Compilation. If the compiler status is 'Disabled', you are ready to go. If not, simply click the 'Disable' button on the right-hand side of the screen.
- **Upload Package:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added.
- **Clear Caches:** This can be done from the admin console by navigating to the cache management page (System->Cache Management), selecting all caches, clicking 'refresh' from the drop-down menu, and submitting the change. Log out and login back in Admin.
- **Admin Configuration:** Go to Admin ->System->Configuration->Scommerce Configuration -> Lazy Load Images -> General
  - **Enable :** Enable / Disable Module
  - **License key :** Enter License key provided by Scommerce Mage

**Theme changes:** If you are not using your custom theme then this module should work out of the box. But if you are using custom theme then follow the following steps -:

- **Check if you have the following file in your custom theme folder**
  - **/app/design/frontend/default/<custom>/template/category/list.phtml**

**If the above file does exist in your custom theme then copy the differences from the following file -:**

- **/app/design/frontend/default/base/template/category/list.phtml**
- **Clear Caches:** Once you are done with everything above, clear the cache to get the changes reflect on your website.
