 - Home Page Excluded from Lazy Loading
 - Lazy Loading on the Category Page
 - Lazy Loading on the Search Page
 - Lazy Loading on the Cart Page.

Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

Configuration Settings for Optimiser Base

Go to **Admin > Stores > Configuration > Scommerce Configuration > Optimiser Base**

General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.
- **License Key** - Please add the license for the extension which is provided in the order confirmation email. Please note license keys are site URL specific. If you require license keys for dev/staging sites then please email us at support@sccommerce-mage.com.

General Settings

Enabled [store view] Yes

This setting will enable or disable all modules related to optimisation. This includes **Image Optimiser**, **Lazy Loading**, **Cache Warmer** and **Google Speed Optimiser**

License Key [store view] \$2y\$10\$CBtDAPFgid6hhNf1FyasV.HXN3FNHo2M3lYsgNa4/SaSBsDmZTjKO

This setting will verify your license key for the give domain

N.B. License keys are domain specific so for your testing or staging sites please email us at core@sccommerce-mage.com

Configuration Settings for Lazy Loading

Go to **Admin > Stores > Configuration > Scommerce Configuration > Lazy Loading**

General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.
- **Loading Icon** - Show a preview image before the real image loads.
- **Skip Images Count by page category** - Enter a valid image count to skip the images from lazy load. Based on the count this option will decide how many images to load without lazy loading.
- **Ignore Images that Contain** - Provide a part of an image tag content into the field to exclude the image from the lazy load.
- **Exclude Pages** - Select the page(s) from multi-select options to exclude from the lazy load.
- **Lazy loading for product only on category page** - Select "Yes" to apply lazy load on product images only on category page.

General Settings

Enabled [store view] Yes

This setting will be used to enable or disable module

Select "Yes" to enable the module

Loading Icon [store view] Choose File No file chosen

Show a preview image before the real image loads.

Please choose the file for Loading Icon

Skip Images Count by page category [store view]

Page Type	Skip Count	Action
Category Pages	5	
Product Pages	2	
Home Page	2	
<input type="button" value="Add Type"/>		

This setting will be used to exclude the X number of images from Lazy Load based on page type selection. This option will decide how many images to load without lazy loading.

Please add Skip Images Count by page category

Ignore Images that Contain [store view]

Matched Expression	Action
Fusion Backpack	
<input type="button" value="Add Match"/>	

This feature will be used when there will be a compatibility issue with image loading. Provide a part of an image tag content into the field and all images containing the inserted lines in their tags will be excluded from the extension's Lazy Load. For example: owl

Please add Ignore Images that contain

Exclude Pages [store view]

None
Home Page
Category Pages
Product Pages
CMS Pages
Search Pages
Cart Page

This setting will provide option to the user to exclude pages from Lazy Load.

Please select the Exclude Pages

Lazy load for product only on category page

Yes

This setting will apply lazy load on product images only on category page when set it to YES

Select "Yes" Lazy load for product only on category page

Front-end Screenshots

- **Lazy Loading on the Homepage** - To implement lazy loading on the homepage, enable the module from **Admin > Stores > Configuration > Lazy Loading- Enable "Yes"**.
