  - *Understanding the Layout*
  - *Detailed Store Information*

## Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

<https://docs.scommerce-mage.com/magento-2-extensions/installation-via-composer/installation-via-composer>

## Configuration Settings for Advanced Store Locator

Go to **Admin > Stores > Configuration > Scommerce Configuration > Store Locator**

### General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.
- **License Key** - Please add the license for the extension which is provided in the order confirmation email. Please note license keys are site URL specific. Please go to *Admin > Stores > Configuration > Scommerce Configuration > Core* and click on "Verify" to verify the license key.
- **Items Per Page** - Add the number of items to be displayed per page
- **Enabled** - Enter the Google Maps API key to fetch the map for each store

<b>Enabled</b> <small>[store view]</small>	<input type="text" value="Yes"/>	<input type="checkbox"/> Use system value
	This setting will be used to enable or disable module	
<b>License Key</b> <small>[store view]</small>	<input type="text"/>	
	This setting will be used to verify your license key for the given domain <b>N.B. License keys are domain specific so for your testing or staging sites please email us at <a href="mailto:support@scocommerce-mage.com">support@scocommerce-mage.com</a></b>	
<b>Items Per Page</b> <small>[store view]</small>	<input type="text" value="4"/>	
	How many items per page to display	
<b>Google Maps API Key</b> <small>[store view]</small>	<input type="text"/>	
	Follow google Maps documentation to get API Key	

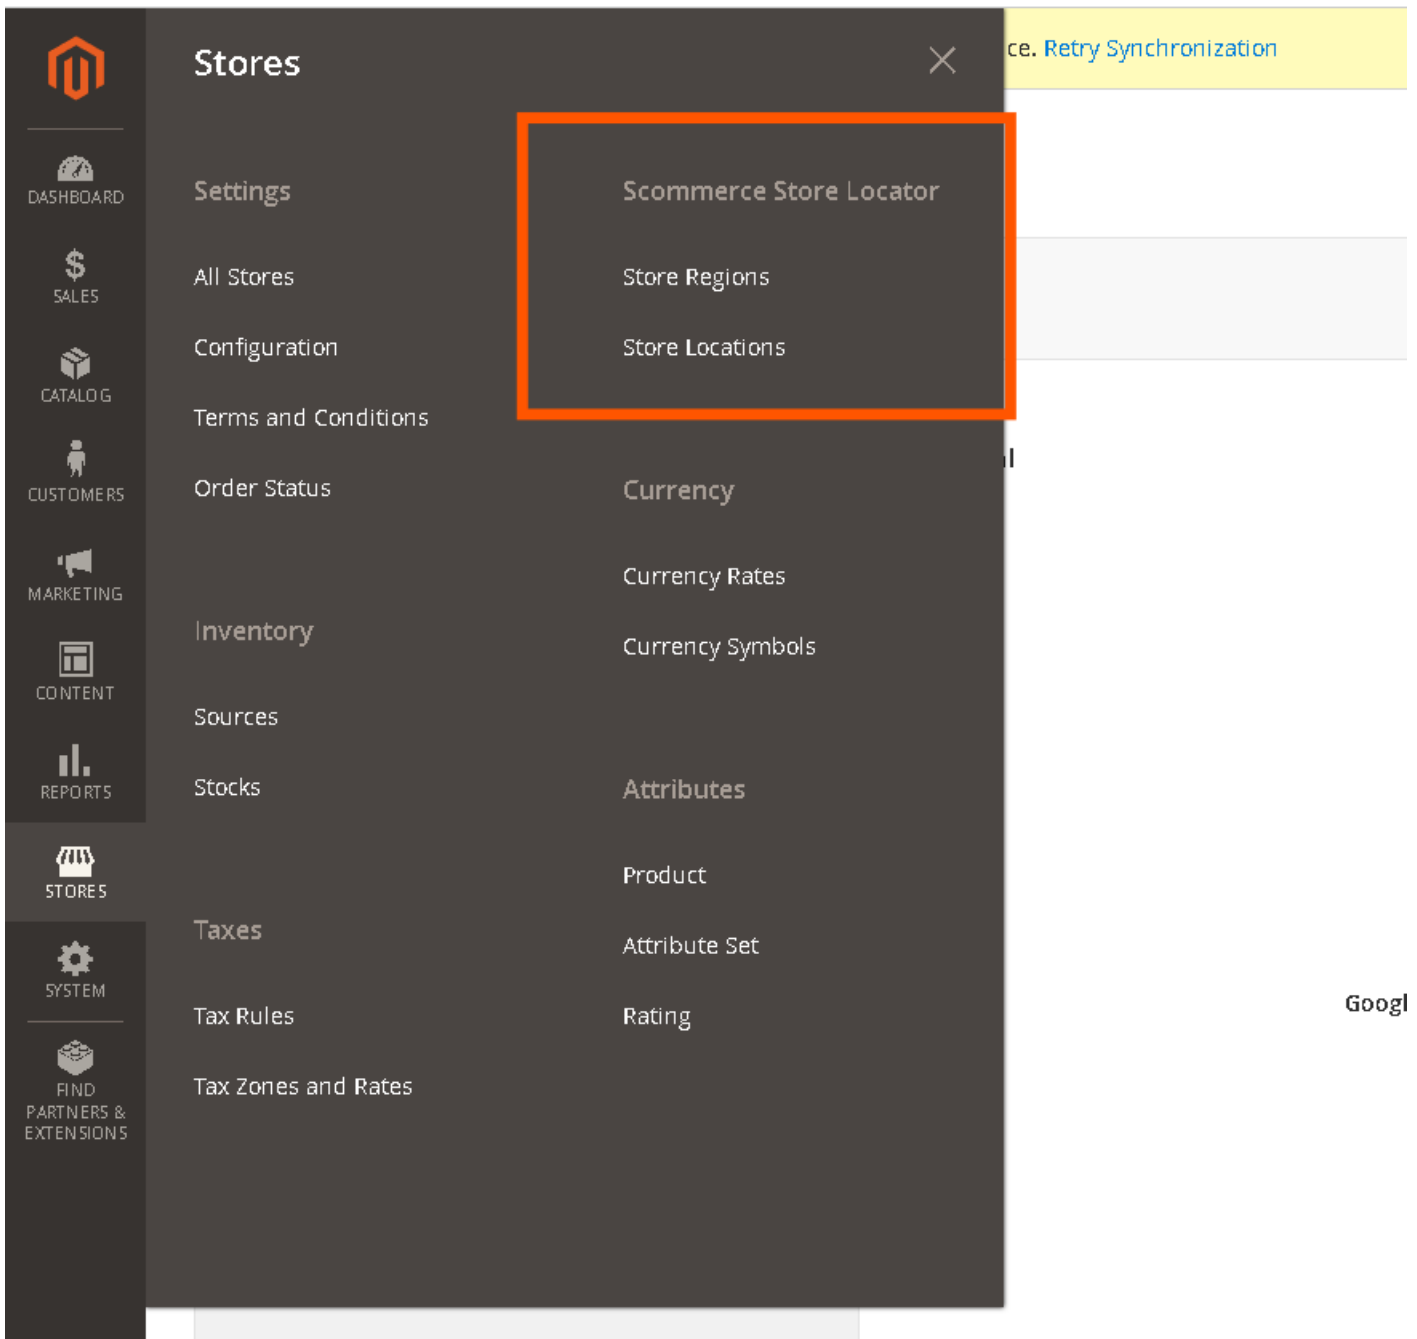

# Store Locator Region Management (Admin)

This section outlines how administrators can create, edit, and delete regions to categorize your store locations effectively.

## 1.1. Accessing Region Management

To begin managing your store locator regions:

1. Navigate to **Admin > Stores > Scocommerce Store Locator** in your Magento 2 Admin sidebar.
2. From the menu, select **Store Regions**.

## 1.2. Creating a New Region

Follow these steps to add a new region to your store locator:

- On the Store Regions grid page, click the **Add New Region** button in the top-right corner.

Check Data

Make sure your file isn't more than 1536M.

## 2. Store Management & Region Association (Admin)

This section describes how administrators can create, manage, and associate individual store locations with the regions you've defined.

### 2.1. Accessing Store Management

To manage your store locations:

1. Navigate to **Admin > Stores > Scommerce Store Locator** in your Magento 2 Admin sidebar.
2. From the menu, select **Store Locations**.

## 2.2. Creating a New Store

Follow these steps to add a new store location:

- On the Store Locations grid page, click the **Add New Store** button in the top-right corner.

Add New Store

- Click **Save Store** to create the new store. A success message will appear, and you will be redirected back to the Store Management grid.

## 2.3. Editing Existing Stores

To modify details of an existing store, including its assigned region:

- From the Store Locations grid, locate the store you wish to edit. The grid displays **ID, Title, Address, Region, Phone, Email, Active, Created, and Actions**.
- In the **Actions** column for that store, click **Edit**
  - Clicking **Edit** will open the store details page where you can modify any of the fields, including the **Region Selection**.
  - Clicking **View** will open the store details page in a read-only mode.
- After making any changes, click **Save Store** to apply your updates.

- Alternatively you can also edit the store and then use the "Delete" button at the top.
- A confirmation pop-up will appear. Click **OK** to confirm the deletion.
- Once a store is successfully deleted, it will be removed from the grid and will no longer appear on the front-end Store Locator. Deleting a store only removes that specific store and does not affect other stores within the same region.
- You can also Mass delete regions using following steps:
  - Select checkboxes next to messages.
  - From the **Actions** dropdown, choose **"Delete"**.
  - Confirm by clicking **"OK"** in the popup.

# 3. Store List Display on Frontend (Customer)

This section describes how customers will interact with the Store Locator on your website's front-end.

## 3.1. Viewing Stores Within a Selected Region

Customers can easily find stores by filtering them by region:

1. Navigate to the Store Locator page on the front-end (typically via a link in the header or footer). **{root\_path}/storelocator**.
2. On the left-hand side of the page, a navigation panel displays a list of available regions.
3. Click on any **region name** from this list.
4. The main content area will refresh to display only the stores associated with the selected region.
5. Each store entry will show:
  - A small **Google Map** snippet based on the store's address.
  - The **Store Name**.
  - The **Store Address**.
6. **Pagination:** If there are many stores within a selected region, they will be paginated. Stores are sorted alphabetically by default. You can navigate through the results using the "Next" and "Previous" controls.
7. **No Stores in Region Message:** If a selected region currently has no stores assigned, a message will be displayed: *"There are currently no stores available in this region. Please check back later or select another region from the list."*

The screenshot shows the LUMA website's Store Locator interface. At the top, there is a navigation bar with the LUMA logo and a search bar. Below the navigation bar, there is a menu with categories: What's New, Women test, Men, Gear, Training, and Sale. The main content area is titled "West Midlands - Store Locations". On the left, there is a "REGION" dropdown menu with options: All Regions (9), Greater London (3), Gutuk (1), North West (3), and West Midlands (2). The "West Midlands" option is selected. Below the dropdown, there are sections for "Compare Products" (You have no items to compare.) and "My Wish List" (You have no items in your wish list.). The main content area displays "Stores in West Midlands" with a description: "A central region in England known for its industrial heritage and growing retail hubs." Below the description, it says "Showing 1 - 2 of 2 stores". There are two store cards, each with a map snippet and store details:

- Birmingham City Store**  
12 New Street, Birmingham B2 4RQ
- Coventry Retail Point**  
88 Broadgate, Coventry CV1 1NB

## 3.2. Viewing All Stores (Without Region Selection)

The Store Locator also allows customers to view all stores without initially filtering by region:

1. Navigate to the Store Locator page (without selecting a specific region). This typically happens when a user clicks on a general "Stores" or "Store Locator" link.
2. **Layout Adaptation:**
  - If **no stores** in the system have an associated region, the layout will automatically be **full width**, as there's no need for the left-hand region navigation.
  - If **at least one store** is linked to a region, the available regions will still be displayed in the **left-hand navigation** panel, even when viewing all stores.
3. The main content area will display a list of all available stores.
4. Each store entry will show:
  - A small **Google Map** snippet based on the store's address.
  - The **Store Name**.
  - The **Store Address**.
5. **Pagination:** Stores are paginated and sorted alphabetically. The pagination threshold can be configured by the admin in the module's backend settings. Users can navigate through paginated results using "Next" and "Previous" controls.
6. **No Stores Message:** If there are currently no stores in the system, a message will be displayed: *"There are currently no stores available. Please check back later."*

The screenshot shows the LUMA Store Locator interface. At the top, there is a search bar and a shopping cart icon. Below the search bar is a navigation menu with categories: What's New, Women test, Men, Gear, Training, and Sale. The main content area is titled "Store Locator" and features a left-hand navigation panel with a "REGION" dropdown menu. The dropdown menu is open, showing "All Regions (9)", "Greater London (3)", "Gutukkkk (1)", "North West (3)", and "West Midlands (2)". Below the dropdown menu are sections for "Compare Products" (with a message "You have no items to compare."), "My Wish List" (with a message "You have no items in your wish list."), and a list of three stores. Each store entry includes a small Google Map snippet, the store name, and the store address. The stores listed are: Birmingham City Store (12 New Street, Birmingham B2 4RQ), Coventry Retail Point (88 Broadgate, Coventry CV1 1NB), and Croydon Outlet (45 High Street, Croydon CR0 1QD). At the bottom of the store list, there is a pagination control with "Previous", "1", "2", "3", and "Next" buttons.

## 4. Store Detail View (Customer)

This workflow describes how customers can access and view detailed information for a specific store.

## 4.1. Accessing Store Detail View

1. From any store list display (either filtered by region or showing all stores), click on the **name of a specific store** or an associated "View Details" link.

## 4.2. Understanding the Layout

- **Region List Visibility:** The presence of the region list on the left-hand navigation on the store detail page is determined by a **configuration setting in the admin panel**. Your administrator will decide whether this list is shown or hidden.
- **Layout Adaptation:**
  - If **no stores** in the system have an associated region, the store detail page will automatically be **full width**.
  - If **at least one store** is linked to a region, the available regions will be displayed in the **left-hand navigation** based on the aforementioned configuration.

## 4.3. Detailed Store Information

The store detail view provides comprehensive information about the selected store, including:

- **Large Google Map:** A larger, more prominent Google Map showing the precise location of the store based on its address.
- **Show Directions:** Clicking on this button takes you to the map (link) where people can view the directions to the store.
- **Store Name and Full Address:** Clearly displayed for easy identification.
- **Telephone Number:** For direct contact.
- **Email:** For direct email communication.
- **Days Open:** The specific days the store is open.
- **Working Hours:** Detailed operating hours.
- **Additional Store Details:** Any extra information provided by the admin.
- **Region:** (If applicable) The region to which the store is assigned, providing geographical context.
- **Back Button:** A button to go back to the list of stores page.

## 4.4. Navigating Back

To return to the store listing:

1. Click the **"Back to Stores" link or button**. This will navigate you back to the previous store listing page, whether it was filtered by region or showing all stores.

- REGION ^
- All Regions (9)
  - Greater London (3)
  - Gutuk (1)
  - North West (3)
  - West Midlands (2)

Compare Products

You have no items to compare.
