  - *General Settings*
  - *360 view settings*
3. Add 360 View Images to a Product
4. Frontend

## Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

<https://docs.scommerce-mage.com/magento-2-extensions/installation-via-composer/installation-via-composer>

## Add 360 View Images to a Product

Login to admin panel and go to Catalog>Products, select a product then click **edit** from the Action column. Scroll down to find '360 View Images' and upload the images as shown in the below screengrab:-

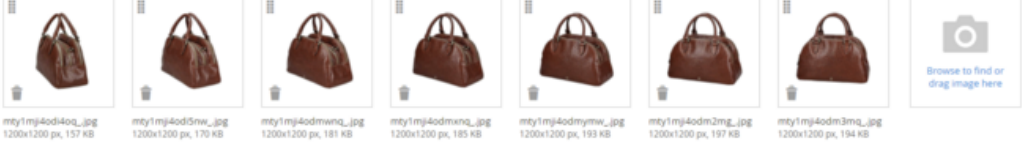

**Joust Duffle Bag** ← Back Add Attribute Save

Configurable products allow customers to choose options (Ex: shirt color). You need to create a simple product for each configuration (Ex: a product for each color). Create Configurations
