Installation

- **Installation via app/code:** Upload the content of the module to your root folder. This will not overwrite the existing Magento folder or files, only the new contents will be added. After the successful upload of the package, run below commands on Magento 2 root directory.

```
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

- **Installation via Composer:** Please follow the guide provided in the below link to complete the installation via composer.

Configuration Settings for Social Login

Go to **Admin > Stores > Configuration > Scommerce Configuration > Social Login**

General Settings

- **Enabled** - Select "Yes" or "No" to enable or disable the module.

Click on the "Add Platform" button to choose the platform for your social apps.

Country: United States
+ Add Platform
Discard Save Changes

After clicking on the Add Platform button you will see the grid with various platform types. Please select Web.

Select Platform

[Facebook Web Games] [Website] [iOS] [Android]
[Windows App] [Page Tab] [Xbox] [PlayStation]

Cancel

+ Add Platform

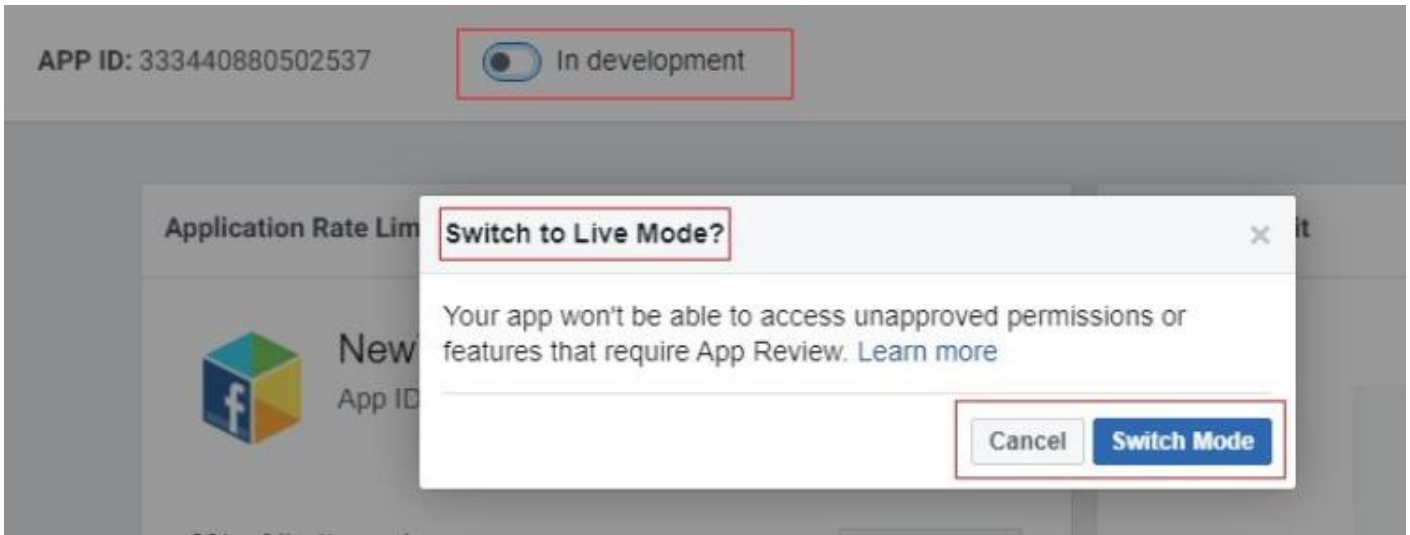

After specifying the platform type, insert your website URL and click on the "Save Changes" button.

The screenshot shows a configuration form titled "Website" with a "Quick Start" button and a close icon. The form contains a "Site URL" label and a text input field with the placeholder text "URL of your site". Below the form is a "+ Add Platform" button. At the bottom right of the page are "Discard" and "Save Changes" buttons.

Enable the "Client OAuth Login" from **Facebook Login > Settings** and provide the "Valid OAuth Redirect URLs".

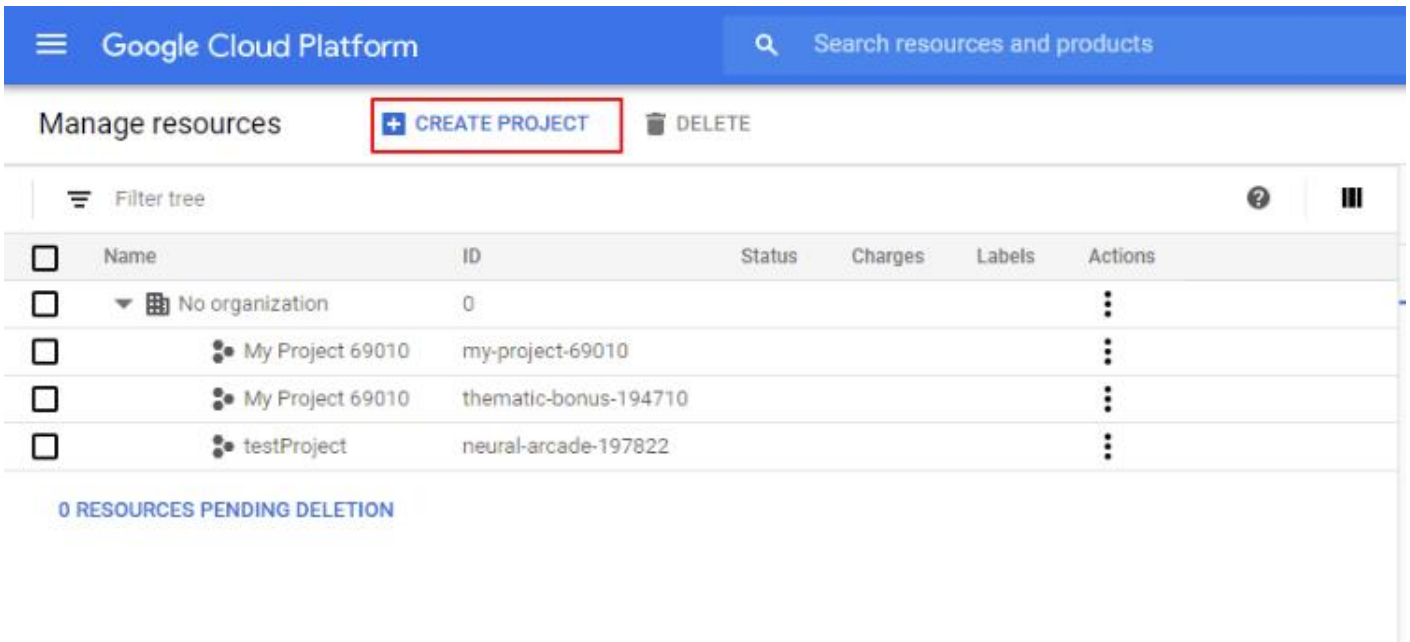

The screenshot shows the "Client OAuth Login" settings page. The "Client OAuth Login" toggle is set to "Yes" and is highlighted with a red box. Below it are several other settings: "Web OAuth Login" (Yes), "Enforce HTTPS" (Yes), "Force Web OAuth Reauthentication" (No), "Embedded Browser OAuth Login" (No), and "Use Strict Mode for Redirect URIs" (Yes). At the bottom, there is a "Valid OAuth Redirect URIs" section with a text input field containing "Valid OAuth redirect URIs.", which is also highlighted with a red box. The "Login from Devices" toggle is set to "No". "Discard" and "Save Changes" buttons are at the bottom right.

To apply the configuration, change the Status from "In development" to "Live".

Insert your Facebook App Id and Secret Key in Facebook settings and Save the configuration.

Create Google App Id - To create Google App go to [Google App](#). Click on the "CREATE PROJECT" button and configure your app settings.

Specify your "Project name", the project ID will be generated automatically.

New Project

Project name *

My Project 5838

Project ID: deft-daylight-275913. It cannot be changed later. [EDIT](#)

API APIs & Services

- Dashboard
- Library
- Credentials**
- OAuth consent screen
- Domain verification
- Page usage agreements

Credentials + CREATE CREDENTIALS DELETE

Create credentials to access your APIs

Remember to use the correct API key

API Keys

Name No API keys to display

OAuth 2.0 Client IDs

Name Creation date ↓ Type

No OAuth clients to display

API key
Identifies your project using a simple API key to check quota and access

OAuth client ID
Requests user consent so your app can access the user's data

Service account
Enables server-to-server, app-level authentication using robot accounts

Help me choose
Asks a few questions to help you decide which type of credential to use

Insert your website URL in the required field. In the field "Authorized Redirect URLs" add redirect website URL. Then, press the Create button.

← Create OAuth client ID

Application type

- Web application
- Android [Learn more](#)
- Chrome App [Learn more](#)
- iOS [Learn more](#)
- Other

Name ?

Web client 1]

Restrictions

Enter JavaScript origins, redirect URIs, or both [Learn More](#)

Origins and redirect domains must be added to the list of Authorized Domains in the [OAuth consent settings](#).

Authorized JavaScript origins

For use with requests from a browser. This is the origin URI of the client application. It can't contain a wildcard (`https://*.example.com`) or a path (`https://example.com/subdir`). If you're using a nonstandard port, you must include it in the origin URI.

Type in the domain and press Enter to add it

Authorized redirect URIs

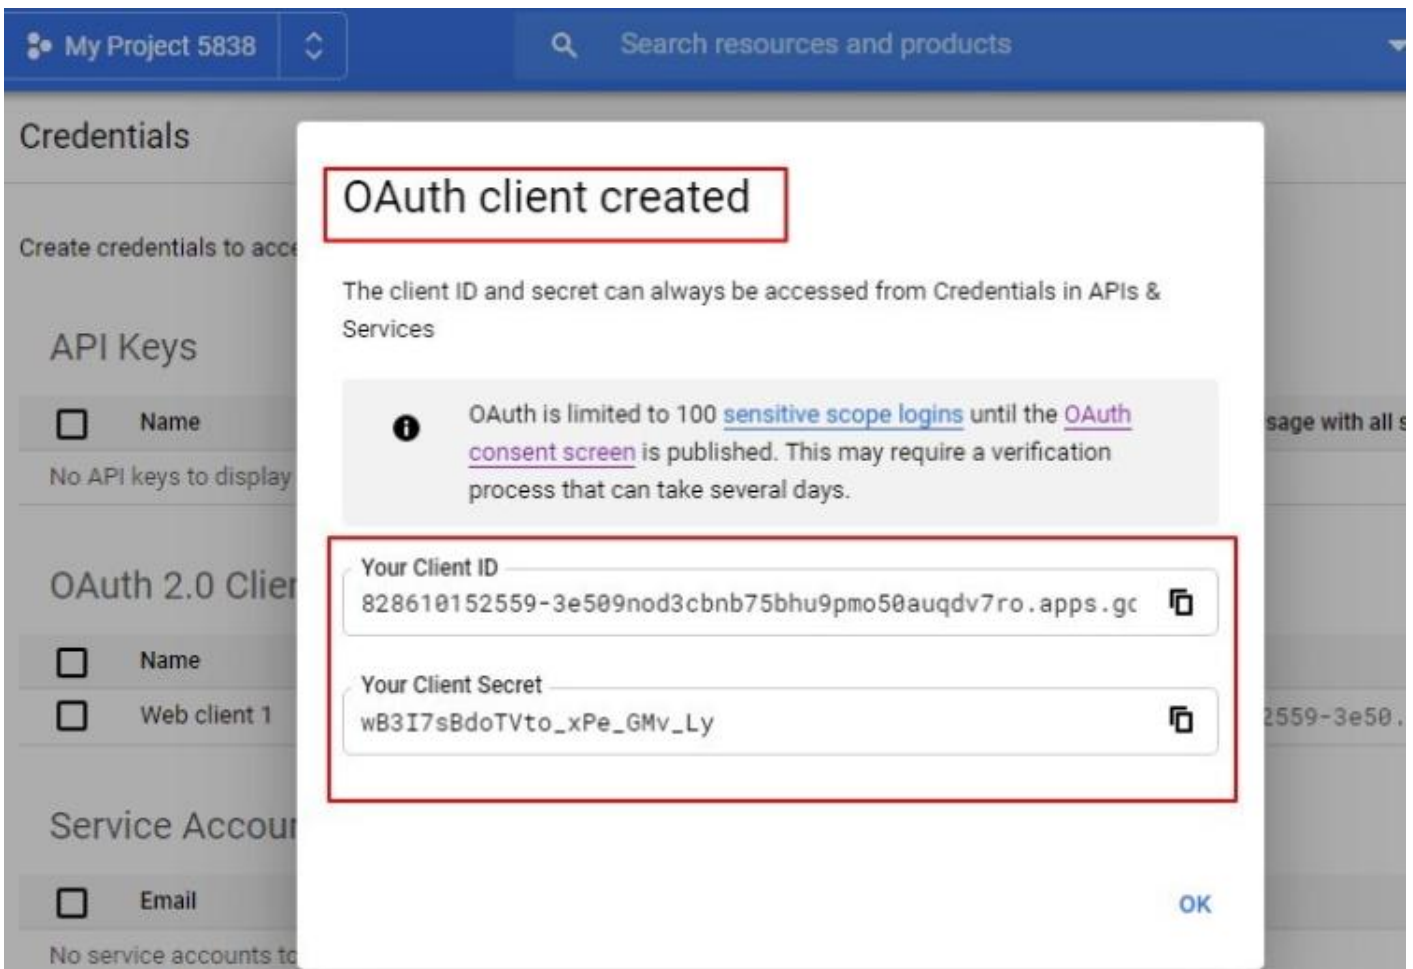

For use with requests from a web server. This is the path in your application that users are redirected to after they have authenticated with Google. The path will be appended with the authorization code for access. Must have a protocol. Cannot contain URL fragments or relative paths. Cannot be a public IP address.

Type in the domain and press Enter to add it

Create

Cancel

Please copy the Client ID and Client Secret. Insert your API KEY (Client ID) and API Secret (Client Secret) in the appropriate fields in the backend Google settings and save the configuration.

Front-end Site View

- **Social Login Options on the Front-end** - When you enable the Facebook and Google logins and select the pages to show social login pop ups from **Admin > Stores > Configuration > Commerce Configuration > Social Login > "Show Social Login Buttons On"** - Customer Login Page/ Customer Create Page/Social Popup Login/Shopping Cart/Checkout, then it shows social login options on the respective pages.
- **Social Login Options on the Sign In Page** - When you click on "Sign in with Google" then it opens Sign in with Google page.
